-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 38, 42, 43, 44, 47 and 51 are rejected under 35 U.S.C. 102(e) as being anticipated by Young et al.

The rejection is set forth in the previous Office Action.

The applicants argue that Constant does not disclose "passively receiving broadcast data" from other aircraft. This is not convincing since Constant does not send out any signal to a specific other aircraft in order to receive the other aircraft position information. Constant clearly teaches each aircraft broadcasting their own position data; thus, each other aircraft receives the broadcasted position information without initiating any contact therebetween.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 39-41, 45, 46, 48, 50 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Young et al in view of Constant and either one of Boisvert or Drouilhet, Jr. et al.

The rejection is set forth in the previous Office Action.

Applicants allege that the claims are allowable due to their dependency on claim 38. Thus, applicants suggest that the claims stand or fall together with the independent claim since no specific showing is set forth to distinguish the claims.

5. Claims 38-48 and 50-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fraughton et al in view of Constant and either one of Boisvert or Drouilhet, Jr et al.

The rejection is set forth in the previous Office Action.

Applicants allege that the claims are patentable since the transmitted commands by Constant do not meet the scope of the "steering commands" of the claimed subject matter. This is not convincing since the command information cited with respect to Constant also meets the scope of the steering command; a commanded position (a relative angle and distance from leader), a

commanded heading, a commanded speed and a commanded altitude are provided from the leader to the following aircraft. Each of these commands meets the scope of a means for generating a steering command to maintain separation between the lead aircraft and the second aircraft in accordance with relative aircraft position of the lead and second aircraft.

6. Claims 38-48 and 50-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coles et al in view of Constant and either one of Boisvert or Drouilhet, Jr et al.

The rejection is set forth in the previous Office Action.

Applicants allege that the claims are patentable since the transmitted commands by Constant do not meet the scope of the "steering commands" of the claimed subject matter. This is not convincing since the command information cited with respect to Constant also meets the scope of the steering command; a commanded position (a relative angle and distance from leader), a commanded heading, a commanded speed and a commanded altitude are provided from the leader to the following aircraft. Each of these commands meets the scope of a means for generating a steering command to maintain separation between the lead aircraft and the second aircraft in accordance with relative aircraft position of the lead and second aircraft.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

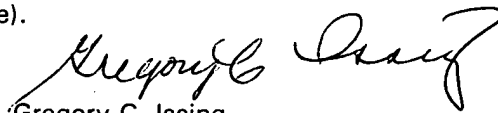

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
